Memory size syntheses of SDK catalogs

C.S = Code Size, D.S.= Data Size

Size in Mo	Delta in Ko

Global size is calculated in adding all of size given in descriptor files of all modules included in System, Manager + SSL DLL + LinkLayer catalogs.

Nota 1 : When zipped code size is egal to 0, it is replaced by unzipped code size.

Nota 2 : Before SDK 9,0, "Goal" products have actually "libgr" configuration.
